The overflow is designed with a secured gasket and a retainer nut that can be hand tightened. An enhanced faceplate simply snaps firmly on without the use of unsightly screws or bolts.

A modern design for simple installation

The overflow elbow adjustable joint allows up to 10 degrees angle adjustment to provide ease of installation for misaligned pipes or angled tub walls, eliminating the need to install offset fittings.

- Up to 10 degrees of angle adjustability
- Snap on faceplate, no screws or tools required
- Retainer nut compatible with standard faceplates
- Secure overflow gasket
- 3 trim options — plug & chain, pop up, lift & turn
- Convertible kit with 3 drainage configurations — direct, indirect, and indirect rear
- Available in a chrome finish

Adjustable Angle Bath Waste and Overflow Kits

Adjusts 10° front to back and side to side matching different tub wall angles.

1. Adjust
   Joint rotates 10° degrees in any direction to adjust to tub wall angle.

2. Turn
   No screws or metal plates, simply tighten faceplate retainer by hand to secure.

3. Snap & Rotate
   Simply snap and rotate the faceplate clockwise onto the retainer.
